Menifee First City in Southern California to Launch Innovative SolarAPP+ Instant Solar Permitting Program

Menifee, CA— In a city like Menifee, with nearly 300 sunny days each year, many of our residents and businesses want to install solar systems. The City of Menifee is proud to be the first city in Southern California and one of only two cities in the state of California to offer the innovative SolarAPP+ program to help make this process quick and easy. SolarAPP+ helps automate residential solar permit processing, which streamlines the application process for our residents.

SolarAPP+ stands for Solar Automated Permit Processing and will help residents receive automated solar plan review and solar permits within minutes. Once the solar company confirms that their project meets certain requirements listed on the [eligibility checklist](#), they can use the automated SolarAPP+ and [Accela Citizen access](#) portal for streamlined permitting for Menifee residents and businesses.

Menifee City Manager Armando G. Villa expressed his excitement about implementing this new technology in Menifee. “Our goal is to make things as easy as possible for our residents and the contractors who serve them. We appreciate that residents and businesses want to install solar and programs like SolarAPP+ make the process efficient so they can get their new solar systems up and running as quickly as possible. That’s the kind of innovation we work hard to bring to the Menifee community,” shared Villa.
