### **Upgraded traffic signals in last year**

**Newport/Winterhawk** – Relocated and replaced traffic signal poles due to street improvements/widening of SW corner as part of Tommy’s Car Wash Project. Old traffic signal controller was replaced with an Advanced Transportation Controller that supports multiple software applications through a single platform.

**Newport/Antelope** – Converting traffic signal to split phase operation. In June 2019 it will be converted to triple northbound left turns and double southbound right turns to improve the level of service and reduce the vehicle queues.

**Antelope/Stillwater** - Replaced old traffic signal cabinet, controller, and components with new modern state-of-the-art art equipment. Traffic signal phasing will be converted to split phase operation to improve safety for pedestrians and left turn vehicle conflicts on side street. In addition, modifications to striping on Antelope are being made in June 2019 to allow southbound u-turns.

**Normandy/La Ladera** - Old traffic signal controller was replaced with an Advanced Transportation Controller that supports multiple software applications through a single platform. The signal phasing was changed from flashing red to normal operation as part of the Audie Murphy Ranch development project.

**Goetz/Audie Murphy South** - Old traffic signal controller was replaced with an Advanced Transportation Controller that supports multiple software applications through a single platform.

## **Upgraded traffic signals planned for next 1 to 2 years**

**Scott/I-215 NB Ramp** – *New traffic signals and equipment due to new interchange.*

**Scott/I-215 SB Ramp** – *New traffic signals and equipment due to new interchange.*

**Scott/Haun** – *Modifications to traffic signal as part of new interchange under construction.*

**Scott/Antelope** – *Modifications to traffic signal as part of new interchange under construction.*

**Menifee/Rouse** – *Modification to signal to add fourth leg to intersection as part of development project.*

**Menifee/Heritage Lake** – *Modification to signal to add fourth leg to intersection as part of development project.*

**Ethanac/Trumble** – *Modification to traffic signal poles due to widening of streets as part of development project.*

**La Piedra/Evans** – *Modification to signal to add fourth leg to intersection as part of development project.*

**Ethanac/Barnett** – *Modification to traffic signal poles due to widening of streets as part of development project.*
